

CYRIL SAVARI BOSCH JYOTHI PRAKASH

Product Manager | AI Products, Discovery & Delivery
Coimbatore, India | +91 99946 29424 | cyrilbosch96@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Product Manager with 4+ years of experience owning AI, mobile, and analytics products from discovery to launch. Owned 30+ features across 7+ client products for US-based founders, turning ambiguous business problems into clear PRDs, roadmaps, and shipped features. Uses rapid prototyping and vibe coding to validate ideas fast, and brings a strong business analysis and data foundation from earlier work that contributed to a 35% increase in annual sales. MBA from Western Michigan University, USA, with an engineering background.

CORE SKILLS

Product Management: Product discovery, roadmapping & prioritization, PRDs, feature ownership, success metrics, MVP / POC development, go-to-market & launch readiness, Agile / Scrum

Product Development: Rapid prototyping, vibe coding (AI-assisted prototyping), user stories & acceptance criteria, release planning, post-launch feedback loops

Business & Stakeholders: Requirements elicitation, process analysis, stakeholder management, client demos & roadmap reviews

Data & Reporting: SQL, Advanced Excel, Power BI, Microsoft Fabric, Tableau, Python, R, dbt, SPSS, KPI dashboards

Tools: Jira, ClickUp, Notion, Confluence, prototyping tools

PROFESSIONAL EXPERIENCE

Techjays (Iderize Technology Solutions), Coimbatore <i>Senior AI Product Analyst</i>	Apr 2025 – Sep 2026 <i>US client engagements</i>
- Owned product delivery for 7+ client products across AI applications, mobile apps, and analytics platforms, partnering with US-based founders and product owners from discovery through launch. - Owned 30+ features end-to-end across multiple Agile sprints, from problem definition, requirements, and prioritization through build, testing sign-off, and release, writing the user stories and acceptance criteria in ClickUp and Notion and staying accountable for each feature's on-time delivery and post-release feedback. - Defined product vision, scope, success metrics, and roadmaps with 3–6 senior stakeholders per product; turned ambiguous business needs into PRDs and functional specs, cutting requirement-related rework by ~30%. - Shipped 4+ AI-driven products (automation workflows, AI-assisted decision systems, data platforms), using rapid prototyping and vibe coding to build MVPs / POCs that validated product direction early and reduced time-to-first-demo by ~25%. - Supported 2 go-to-market launches across feature readiness, onboarding flow design, release coordination, and post-launch feedback that shaped the next iteration. - Led sprint planning, reviews, and retrospectives with cross-functional teams of 6–12 engineers, designers, QA, and data specialists; presented demos and roadmap updates that earned repeat client engagements.	

Elmech Equipment Company, Coimbatore <i>Business Analyst</i>	Jul 2018 – May 2021
- Co-owned operational and product strategy with senior management, translating annual business goals into roadmaps and managing a rolling backlog of 40+ initiatives and change requests. - Led discovery and redesigned workflows across sales, procurement, inventory, and service operations, reducing process cycle times by ~20%. - Built Excel-based sales, finance, and operations dashboards used weekly by leadership to track revenue, margins, inventory turns, and team performance. - Applied quantitative analysis to task allocation, resource utilization, and capacity planning, contributing to a 35% increase in annual sales. - Served as the primary coordination point for 6–8 stakeholder groups across management, operations, and external partners, accelerating execution timelines.	

EDUCATION

MBA – Western Michigan University, Kalamazoo, USA	2024
B.E., Mechanical and Production Engineering – Sathyabama Institute, Chennai	2018
